The main treatment process for fluorine-rich PV wastewater is summarized as chemical precipitation, while biological treatment is primarily used for ammonia-rich and nitrate-rich PV wastewater. ...

Product Features: Standardized structure design, menu-type function configuration, photovoltaic charging module, a parallel off-grid switching module, power frequency transformer, and other components can be ...

Along with the research group, Water and Process Technologies, at AEE INTEC in Austria, which has been researching this application for several years, a pilot plant operating 24/7 at a municipal wastewater ...

The facility now produces around 78 GWh of electricity and 82 GWh of heat, meaning the plant will be able to generate all the energy it requires for wastewater treatment, with energy to spare while reducing Vienna's ...

The E_OS (Energy Optimization through Sludge Treatment) project on the edge of Vienna is a pioneering facility designed to transform the Austrian capital's wastewater treatment plant from a major ...

CASE STUDY Vienna's climate-neutral wastewater treatment plant gets efficiency boost The E_OS (Energy Optimization through Sludge Treatment) project on the edge of Vienna is a pioneering facility designed to ...

In this study, three innovative photovoltaic wastewater treatment routes that integrate resource utilization processes are proposed. A comparative assessment of the sustainability performance of these ...

These materials precipitate out of waste water with low pH and increase turbidity to the discharge. This filtration system accepts batch dumps from etching tools, and then reduces the pH to facilitate filtration. The solution ...
