Two years after the Inflation Reduction Act was signed, few topics generate more attention in the solar industry than domestic content. By 2025, the bonus credit tied to U.S. ...

Dual-use applications such as agrivoltaics, floating PV, and infrastructure-integrated PV are becoming increasingly relevant, helping balance land use, food production, and renewable energy generation.

As of February 2025, photovoltaic bracket prices demonstrate significant variations across configuration

Within product types, roof photovoltaic brackets currently hold a larger market share, reflecting the prevalence of rooftop solar installations. However, ground-mounted photovoltaic ...

More than 500 GWdc of PV are expected to be installed in 2025. At the end of 2024, China and the U.S. had collectively installed more than 1 TWdc of PV. In 2024, wind and solar ...

The US Treasury updated a table last week that is used to calculate the domestic content of solar, onshore wind and storage projects.

Installed solar PV is expected to increase fourfold from now to the end of 2025, increasing from its 2.1GW level to reach 8.5GW, when it will represent around 94% of the ...

How much energy does solar PV generate in 2022? being two thirds of new capacity. The difference between capacity and generation is due to the different capacity

Photovoltaic (PV) solar accounted for 58% of all new electricity-generating capacity additions through the third quarter of 2025, remaining the dominant form of new electricity-generating ...
