Discover the biggest commercial battery storage UK projects in 2025, including NatPower's Teesside GigaPark, Statera's Carrington, RES's Coalburn etc.

As of June 2023, there are 161 operational BESS sites in the UK of varying sizes with a combined electricity storage capacity of 2.6GWh (enough to power around 5 million homes for an hour).

Map of energy storage facilities in the UK, with information provided by research organisations and from the Department for Business, Energy and Industrial Strategy (BEIS).

This article emphasises the top 10 energy storage companies in the United Kingdom, which are critical participants in the development of the infrastructure necessary to future-proof the power system.

As the UK retires its coal-fired generation fleet, there is a growing number of sites that are set up to export energy to the grid yet are sitting idle. That is the case with the Richborough Energy Park energy ...

From mountainous pumped hydro to cutting-edge cryogenic and compressed air technologies, the UK is deploying a broad portfolio of energy storage solutions to ensure energy security, decarbonisation, and grid ...

We are developing up to 2GW of transmission-connected battery storage across the UK, providing the flexibility needed to accelerate net zero.

Discover everything about the battery energy storage system UK. Learn benefits, case studies, and future prospects of UK battery energy storage systems today.

Thurrock Storage, the UK's largest battery energy storage system (BESS) developed by Statera Energy is now energised and delivering electricity to the grid. This landmark 300MW battery storage site is ...

Are there any energy storage power stations in the UK

This is a list of current and former electricity-generating power stations in England. For lists in the rest of the UK, including proposed stations, see the see also section below. Note that DESNZ maintains a comprehensive list of UK power stations.
