Australia's home energy landscape has changed. The 2026 battery rebate is now helping households and small businesses make battery storage far more affordable. With energy prices rising and solar ...

Federal Energy Minister Chris Bowen has announced big changes to the government's battery subsidy scheme amid claims most of its \$2.3 billion budget has been spent in just six months.

Spearheaded by the Smart Energy Council and supported by a range of experts and industry stakeholders, the initiative aims to reduce the upfront cost of home batteries, enabling more ...

Labor's \$2.3 billion program applies to people with existing solar, or for those wanting to invest in a new solar-plus-battery set-up. It won't be means-tested and offers a 30 per cent discount ...

One in 24 households now have a battery connected to the solar PV systems. Australian households, businesses and community organisations can get a discount of around 30% on the ...

Find out more about how to choose, use and maintain your rooftop solar and battery system with the Solar Consumer Guide. The Cheaper Home Batteries Program is supporting Australian households ...

The Australian Government solar battery rebate began on 1 July 2025. It's a government discount that comes off the battery price upfront when you buy an eligible home battery.

Australia's new battery rebate scheme slashes solar storage costs by up to 30%. SolisStorage's hybrid systems are subsidy-ready, helping households cut energy bills while ...

Households and small businesses may be eligible for around a 30% discount on the upfront cost of installing a small-scale solar battery. The discount is based on the solar battery's ...

Australian grid solar battery cabinet subsidy

One in 24 households now have a battery connected to the solar ...

Program Introduction Launched under the federal budget, the subsidy addresses battery affordability to boost grid stability and household savings. Administered through Small-scale ...
