We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems.

Discover how Bolivia navigates technical hurdles and political tensions to unlock its vast lithium reserves for the global battery market.

By developing an industry focused on processing lithium into batteries domestically, Bolivia can create jobs, enhance skill development, and retain more value within the country.

In a significant development that could impact the global energy storage and electric vehicle (EV) market, Rosatom, Russia's state atomic energy corporation, has announced its ...

Bolivia will try and capitalise on its large lithium reserves to set up an industrial ecosystem around batteries and other storage technologies, according to a top government official.

In this article, we'll explore the top 10 battery manufacturers in Bolivia and their contributions to strengthening the battery supply chain at both the local and global levels.

The largest lithium-ion battery storage system in Bolivia is nearing completion at a co-located solar PV site, with project partners including Jinko, SMA and battery storage provider Cegasa.

The new estimate further cements Bolivia's position as the country with the world's biggest known deposits of lithium, which is in high demand for use in batteries.

A giant Chinese battery company, Catl, has won a bidding process to develop Bolivia's huge lithium reserves. The ultra-light metal is used in electric vehicle (EV) batteries, production of...

Bolivia lithium battery station cabinet factory energy storage battery

Norwegian battery cell producer Morrow Batteries has opened Europe's first lithium iron phosphate (LFP) gigafactory with an annual production capacity of 1 GWh to supply the ever-growing European ...
