British Solar Renewables was acquired by ICG Infrastructure in July 2022. Earlier this month, Root-Power secured planning permission for a 100MW / 200MWh battery energy storage ...

We've delivered some of the UK's most advanced and largest battery energy storage systems (BESS), combining engineering precision with responsible development and community care.

British Solar Renewables (BSR) has achieved financial close on a GBP 345 million debt facility to support a 609 MW portfolio of solar and battery energy storage system (BESS) projects ...

Battery Energy Storage Systems store renewable energy for use when the National Grid needs power. This aids in transitioning to a low carbon economy and achieving the UK's net-zero goal by 2050. ...

Discover BESS solutions by Solev Energy Group. Store surplus solar energy, support EV charging, and optimize energy costs with advanced battery storage technology.

British Solar Renewables reached financial close on 12-project solar portfolio with three co-located battery energy storage system (BESS) assets. The GBP 345 million financial package covers...

However, within the UK, numerous sites over 1GWh in size have already been approved and construction has begun on some of these sites that will ultimately become some of the largest ...

Jameel Energy's Fotowatio Renewable Ventures (FRV) drives sustainable growth with solar and BESS projects shaping the UK's green future. Read more.

The Scottish government has given Kona Energy the green light for the construction and operation of the Smeaton battery energy storage system (BESS), a 228 MW/456 MWh project near ...

INRG has completed the sale of its Little Crow solar-battery project to British Solar Renewables (BSR). The

British Solar Energy System BESS

project, located in the UK, consists of a 150MW solar farm and a 60MW ...
