What is a solar powered clinic?

Our solar powered clinics have been designed and engineered to be energy efficient, operating on less than 500 watts of electricity. From the air-conditioning system to the choice of lighting, our clinics utilize only green technology and medical equipment.

What is a microgreen containerized energy storage solution?

The core technology used in Microgreen containerized energy storage solutions are top quality Lithium Ferrous Phosphate (LFP) cells from CATL. CATL's 280Ah LiFePO<sub>4</sub> (LFP) cell is the safest and most stable chemistry among all types of lithium ion batteries, while achieving 6,000 charging cycles or more. CATL serves global automotive OEMs.

Why do medical devices need a battery management system?

And more... Medical devices and equipment are critical to high-quality patient care and are designed to support battery energy sources for power backup, portability or mobility applications. As a result, the battery sources and management systems are vital components of any equipment for safe and reliable operation.

Why is Excell battery a trusted partner for Thornhill medical?

Excell Battery has become a trusted partner for Thornhill Medical and its integrated, portable life support system by supporting a rapid ramp-up in production during the global pandemic and leveraging its battery engineering and manufacturing experience.
