The grid-scale battery is expected to deliver 250MW of storage, support grid reliability and help to integrate greater amounts of renewable generation. The ACT Government also said that ...

This allows renewable energy to flow to homes and business across Canberra when demand is high and solar generation drops. Construction is now underway on concrete bases for the ...

ITP Renewables was engaged by ECU Energy to provide expert planning support throughout the development and delivery phases of the 250 MW Big Canberra Battery system, which will begin ...

The Fadden and Dickson energy storage systems have been installed and are expected to be operational by the end of November 2025. This pilot project received funding from the Federal ...

It is expected to be operational in 2026 and will be able to store enough renewable energy to power one-third of Canberra for two hours during peak demand periods.

The Big Canberra Battery project has reached another milestone. A transformer was delivered to the Williamsdale construction site this week. The transformer makes sure the electricity ...

Two big batteries have already been built in Canberrans - the 10MW/20MWh Queenbeyan battery owned by GPG is already operating, while the 100MW/200MWh Capital battery ...

The Australian Capital Territory (ACT) government has announced the development application has been approved to deliver the first stream of the Big Canberra Battery project that is to ...

"Through the Big Canberra Battery project, the ACT Government is building a network of batteries across the Territory to help future-proof our energy system." Minister Orr said that the new ...

Canberra solar container battery Project Progress

The 250-megawatt (MW), 500 megawatt-hour (MWh) battery energy storage system (BESS) will store enough renewable energy to power one-third of Canberra for two hours during peak demand periods, ...
