Which countries are deploying Bess?

However, as highlighted above, despite decreasing costs, the deployment of BESS is currently led by China, the United States, and the countries of the European Union, while emerging economies have seen limited deployment (IEA 2024a).

Does Bess work in Samoa?

In moving from study to implementation, the proposed effects of BESS are clearest in the case of Samoa, where IRENA's grid integration study informed the deployment of a 6-MW/10.2-MWh battery bank and a 2-MW/3.4-MWh battery bank on the island of Upolu.

What is Bess deployment?

deployment across emerging economies exploring the enabling environments, financing structures, and key market opportunities to help overcome critical barriers to BESS deployment around the world, especially in emerging economies.
