-----

Wind power is all about using the energy from the wind to do useful things. Long ago, people used wind to power sails on ships, turn windmills to grind grain, and pump water with windpumps. But today, ...

When wind causes the blades to spin, they turn the shaft. The turning shaft provides power to a machine called a generator, which produces electricity. A group of wind turbines, called a wind farm, can be ...

Wind turbines are tall towers with blades that spin when the wind blows. Inside the turbine, the spinning blades turn a generator, which makes electricity. You can learn more about wind ...

Kids learn about wind energy and how this renewable power can help the environment. Teach students about turbines that generate electricity from wind.

Wind power is a form of energy that we get from the wind. Just like we use sunlight or water to generate electricity, we can also capture the energy from the wind. When the wind blows,...

Learn how wind turbines work and explore the different types of wind energy, from small turbines to massive offshore wind farms. This site includes lots of cool facts about wind power and its impact on ...

Learn how wind turbines generate electricity using kinetic energy in this BBC Bitesize Scotland article for upper primary 2nd Level Curriculum for Excellence.

Wind energy has been used to pump water for centuries, and wind farms have powered generators for years. At this wind farm near Wasco, Oregon, United States, a windmill drives an ...

Using simple materials students learn how to harnesses the power of the wind. Whether you're teaching about environmental science, climate change, or energy solutions, this activity is a ...
