-----

In a significant technological advancement, the country's largest "coal-to-power plus molten salt" storage project, located in Suzhou, east China's Anhui province, recently completed a ...

The China PV Industry Development Roadmap (2024-2025) covers various aspects of the photovoltaic (PV) industry chain, including 76 key indicators such as polysilicon, PV cells and ...

Energy After the mandate: China's energy storage sector one year on With clean energy projects no longer needing to be bundled with energy storage, companies are finding new ...

China installed a record 315 GW (AC) of new solar capacity in 2025, lifting cumulative installed PV capacity to 1.2 TW and pushing non-fossil power sources past thermal generation for the ...

By the end of 2023, China had completed and put into operation a cumulative installed capacity of new type energy storage projects reaching 31.4GW / 66.9GWh, with an average storage duration of 2.1 ...

Following Wood Mackenzie's recent presentation at the SNEC Solar PV Conference & Exhibition in Shanghai in June, we share our insights on the global reach of China's solar and ...

Reducing carbon footprint of PV products is critical for policy design. Over recent decades, China has risen to a preeminent global position in both solar photovoltaic (PV) adoption and ...

For the past year and a half, Chinese manufacturers have been selling solar modules and storage systems at rock-bottom prices, trying to move oversupply even while posting losses.

China has remained the world's largest market for wind and solar power for many years and has built a comprehensive industrial supply chain spanning photovoltaic modules, wind turbines, ...

Shares of Chinese solar panel makers surged after a team of staff sent by Elon Musk had reportedly visited

several photovoltaic suppliers in China.
