In this article, we consider trade of three key minerals needed for batteries--graphite, lithium, and cobalt--among China and key global regions. These minerals are mined or extracted ...

Faced with China's dominance of the lithium supply chain, western officials are pitching their investment offer to African countries as a more socially responsible alternative.

With the global shift to electric vehicles (EVs) accelerating, China is cementing its dominance over the lithium supply chain by pouring investment into African mines, creating a new center...

Chinese miners and refiners are driving a surge in African lithium output, shrugging off concerns over a glut to lock in future supplies of the critical battery metal.

China has a virtual monopoly on lithium extraction in Africa. More than four-fifths, or 83%, of Africa's forecast lithium supply this decade will come from projects at least partly owned by ...

African lithium reserves are critical to meeting future demand requirements. Driven by capacity additions in Zimbabwe, Mali and Nigeria, African lithium production is forecast to grow at a ...

Chinese miners and refiners are driving a significant increase in African lithium production, pushing forward despite concerns of an oversupply to secure future resources of this essential battery metal.

Faced with China's dominance of the lithium supply chain, western officials are pitching their investment offer to African countries as a more socially responsible alternative.

Geographically, the global supply is heavily reliant on China with competition expected to intensify. In light of this, the questions of how global competition manifests at the company level and ...

China and Africa sell lithium battery packs

For now, Africa will rely on Chinese investments to grow its lithium sector, making effective negotiation with Chinese interests essential for maximising its potential and influencing the global ...
