Solar Energy Information. Read the latest news and techniques for efficient solar photovoltaic power, new solar energy systems and more.

The U.S. Department of Energy is supporting various efforts to address end-of-life issues related to solar energy technologies, including recovering and recycling materials used to manufacture PV cells and ...

China's efforts to rein in photovoltaic (PV) oversupply are unlikely to meaningfully reduce existing overcapacity and global solar panel prices are expected to stay low through much of 2025, ...

French researchers have developed a high-resolution computational framework to model microclimate effects of large floating solar PV systems, enabling accurate predictions of heat transfer,...

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry.

The cost of solar panels has dropped by more than 99 percent since the 1970s, enabling widespread adoption of photovoltaic systems that convert sunlight into electricity.

Photovoltaic (PV) solar accounted for 56% of all new electricity-generating capacity additions in the first half of 2025, remaining the dominant form of new electricity-generating capacity ...

ANAHEIM, California and WASHINGTON, D.C. -- Solar module manufacturing capacity in the United States now exceeds 31 gigawatts (GW) -- a nearly four-fold increase since the Inflation ...

U.S. residential solar companies are preparing for a steep drop in business this year after the expiration of a federal tax credit that helped drive more than a decade of rapid growth, prompting...

We are here to bring you the latest solar news, progress and innovations, and everything else that you need to

# Clean Photovoltaic Panel News Report

and want to know about the solar industry.
