New electronics are likely to have just a bit of odor when first turned on and heated up. The problem should not continue barring some defect or improper power connection. Do not, under ...

I just unpacked a brand new power supply unit (PSU) from Microcenter, and it has a strange, off-putting odor that reminds me of a zoo or manure. Is this common for a PSU straight from ...

It might have just been some dust if the PC hasn't been on for a while, but since you said it was like a plastic smell it's not worth the risk to your other components or the possible fire risk in a worst-case ...

New electronic smell with mainboards, GPUs, PSUs etc. is normal. It should be gone after the first days of stress testing. If you skip a few days of burn tests/stress testing with a new system, ...

It's normal for new Transformers to release some harmless odors from the varnish impregnation used in the coils for a week or two after energization. Older Transformers can also release some odor if ...

It comes when PSU fan is on and psu has heated up a bit. Its not a burning smell but rather a heated oil type of smell, I can smell it when I bring my nose closer to the exhaust of the psu.

I tried conectting my old psu but it only has a 6 pin connector for the GPU, what should I do? Get another psu, that's all you can do really. Don't take shortcuts with power supplies.

New PSUs will often emit a smell which can be due to flux, adhesives or other materials used in manufacturing. This will typically go away with time and use, however there ...

Yeah, it's totally normal for new power supplies to have a weird smell when you first get them. Don't sweat it too much! It usually fades over time as the components settle in.

Yes, it's normal for a new PSU to smell funny when it runs, i've rarely had a PSU that didn't smell at the

Energy storage power supply has a smell

beginning. Some plastics (plasticizer) and lacquers for example are gassing out ...

I recently bought an EVGA 600w power supply, I walked into the room to check on a windows update and noticed a peculiar smell coming from the psu, it smelled kind of like a AA battery ...

I would suggest an RMA as it could be a burning wire or something small that could kill your system. I have installed hundreds of new psu"s without a smell. PSU units that smell ...
