California built a \$2.2 billion solar thermal project in the Mojave Desert in the early 2010s, with 75% of it funded by the Obama administration through loan guarantees. The project, the Ivanpah Solar ...

One of the most ambitious solar projects in history is quietly heading for shutdown after just a decade of operation. The Ivanpah Solar Power Facility in California's Mojave Desert was once...

LOS ANGELES (AP) -- What was once the world's largest solar power plant of its type appears headed for closure just 11 years after opening, under pressure from cheaper green energy sources.

In January, PG& E announced a deal with the owners of the Ivanpah solar plant -- which covers five miles of federal land in the Mojave Desert near the California-Nevada border -- to stop buying power from ...

Headlines have been circulating major news outlets around the impending closure of the Ivanpah Solar Power Facility, a \$2.2 billion project that began construction in 2010 and has been providing electricity ...

Outdated technology and mounting financial challenges have rendered the plant less viable, prompting PG& E to cancel its power purchase agreements originally set through 2039.

A major solar power plant project that was granted over a billion dollars in federal loans is on the road to closure, with energy experts blasting the project as a "boondoggle" that harmed...

Two Ivanpah units are slated to close starting in 2026, per a January 2025 announcement pending CPUC approval. Here's the original context and what repurposing could look like.

What was once the world's largest solar power plant of its type appears headed for closure just 11 years after opening, under pressure from cheaper green energy sources.

The partially taxpayer-funded Ivanpah Solar Power Facility in California's Mojave Desert is set to shut down

Financial Closure of Solar Power Plant

in 2026 due to inefficiency in generating solar energy, according to the New York...
