FlexGen is currently focused on integrating grid-connected battery energy storage system (BESS) assets in the US but was established as a global specialist in microgrids back in 2009.

With its Remote Operations Center and Battery Innovation Lab, FlexGen provides unmatched management, monitoring, and energy storage optimizations for energy storage assets.

FlexGen provides turnkey and hardware-agnostic solutions for designing, integrating, and operating energy storage assets to address the top four challenges of speed, cost, reliable cutovers, and power ...

Leveraging its best-in-class energy management software and power electronics, FlexGen delivers utility-scale storage projects integrated with traditional and renewable power generation...

FlexGen is a leading energy storage technology company. Leveraging its best-in-class energy management software and power electronics, FlexGen delivers utility-scale storage projects ...

Independent generator Middle River Power has selected FlexGen Power Systems to deliver 420 MW of battery energy storage systems to pair with and relieve natural gas-fired peaking plants across four ...

Creating a more sustainable and reliable power grid - FlexGen designs and integrates battery energy storage solutions and the software platform that is enabling today's energy transition.

FlexGen is a leading integration services and software technology provider for energy storage solutions in the United States and globally. FlexGen designs and integrates storage ...

FlexGen is the developer of the FlexGen HybridOS energy management system, which is capable of automating the dispatch of energy storage, renewable, and conventional power generation to provide ...

Two utility-scale battery energy storage systems are now fully operational in Wisconsin and Iowa, marking an

Flexgen energy storage

important milestone for grid reliability and renewable integration. Batteries designed ...
