Data is based on center of glass performance of representative factory production samples. Actual values may vary due to the production process and manufacturing tolerances.

Due to the improved durability and lower degradation over time, glass-glass solar modules often achieve higher efficiency and performance compared to conventional modules.

For actual product comparisons, it is recommended to view samples and consult the manufacture for performance data of specific products that are being evaluated.

Based on vendor testing, clear acid-etched glass performance data is estimated using regular clear glass of equivalent thickness. Glass colors represented herein are included only for the general purpose of ...

Selecting glass for a project is an important and sometimes difficult task, to assist in this process G.James offers the following recommendation for viewing glass samples.

o Except as otherwise noted, each glazing configuration consists of 6 mm clear glass with a #2 surface coating : 1/2" air fill : clear glass. o This list is not meant to be a comprehensive listing of comparable products.

Reolink Go Series G440 is a 4K 8MP 4G LTE wireless camera, battery/solar powered, featuring 355° pan & 140° tilt, smart detection, color night vision, two-way audio, etc.

COMPARISON GUIDE Find the product that fills your home with natural light while reducing your bills and carbon footprint.
