What if I don't register my solar panels?

If you're a shared owner or a homeowner and you haven't registered your solar photovoltaic (PV) panels, and they were installed after 14 January 2016, you can apply to your electricity supplier to get the 'Feed-in tariff' (FiT) payments. This is in effect a grant from the Government according to how much electricity your panels are generating.

How do I install a home solar power system?

The first step of installing a home solar power system is to design an installation that best suits your property and energy demands. By working with a solar professional or designing your system with a home solar estimator, you can make the critical installation decisions necessary to file for your permits.

Do I need a permit to install solar panels?

If you want to install solar panels, obtaining the proper solar permits is an essential step to ensure your energy system can operate safely, legally, and at no risk to your roof, home, or those living on site. To help set project expectations, prepare for your installation and maximize long-term savings on your electricity bills.

How do I get a solar permit?

Come prepared every step of the way. To file for your solar permit, you may need to provide proof of home ownership alongside detailed site plans, system specifications, contractor licenses, and other relevant documentation.
