Hungary has no offshore renewable energy sector, and there are no current or planned offshore projects due to its landlocked status and the environmental protections on inland waters.

Renewables such as solar panels, wind turbines and hydroelectric dams generate electricity without burning fuels that emit greenhouse gases and other pollutants.

Detailed info and reviews on 6 top Renewable Energy companies and startups in Hungary in 2026. Get the latest updates on their products, jobs, funding, investors, founders and more.

Hungary's energy sector is undergoing a profound transformation. Once heavily dependent on conventional power sources, the country has emerged as a regional leader in solar energy ...

In January 2020, the Innovation and Technology Ministry published the reworked version of Hungary's National Energy Strategy 2030, confirming Hungary's commitments to ambitious renewables targets, ...

The expansion of domestic solar energy has been particularly remarkable, as over the summer Hungary's solar capacity surpassed 8 gigawatts, marking a historic milestone, while ...

Hungary is the EU country with the smallest forecast penetration of renewables of the electricity demand in 2020, namely only 11% (including biomass 6% and wind power 3%).

Overview
Wind power
Solar power
Hydro power
Geothermal power

Hungary is a member of the European Union and thus takes part in the EU strategy to increase its share of renewable energy. The EU has adopted the 2009 Renewable Energy Directive, which included a 20% renewable energy target by 2020 for the EU. By 2030 wind should produce in average 26-35% of the EU's electricity and save Europe EUR56 billion a year in avoided fuel costs. The national authors of Hungary fore...

Hungarian renewable energy operating sites

This report lists the top Hungary Renewable Energy companies based on the 2023 & 2024 market share reports. Mordor Intelligence expert advisors conducted extensive research and identified these ...

Hungary plans to increase the share of renewable energy sources to at least 21 % within gross final energy consumption. The major drivers toward the 2050 target include renewable and ...

In the city of Kaba, the company began building on the largest component of its Hungarian renewables portfolio: the almost 70-hectare Kaba Solar Park, which will offer electricity to more than 20 thousand ...
