In 2024, Safaricom (NSE: SCOM) achieved a significant milestone in its efforts to lead Kenya's digital transformation, announcing that it has surpassed 1,000 active 5G sites nationwide.

From off-grid villages to data centres, solar is powering connectivity while building a cleaner, more sustainable future for Kenya. Watch how Safaricom is turning boosters into beacons of green...

Emerging markets in Africa and Latin America are adopting mobile container solutions for rapid electrification, with typical payback periods of 3-5 years. Major projects now deploy clusters of 20+ containers creating ...

Kenya has issued a new tender for a solar-plus-storage project at Seven Forks, combining 42.5 MW of solar power with a 3 MW/4.5 MWh battery system. Discover how this ...

Explore the drivers of 5G tower deployment in Kenya. This guide covers the 5G rollout by Safaricom and Airtel, network challenges, and new connectivity opportunities.

Successful delivery of the reflected radio waves to the 4G equipment was confirmed at the test site in Kenya. This is the world's first successful establishment of wireless communication between a fixed ...

For a company like Safaricom, which has base stations scattered across off-grid locations running on diesel generators, that energy bill, and carbon footprint, is a massive liability. To fix this, ...

Container Energy Storage System: All You Need to Know Container energy storage systems are typically equipped with advanced battery technology, such as lithium-ion batteries. These batteries offer high energy ...

Safaricom has replaced diesel generators with solar panels at over 1,500 base stations across Kenya. Here's how this shift is improving network stability, reducing carbon emissions, and shaping a ...
