Making the transition to renewable energy sources around the world is crucial to hitting our climate goals. By July 2025, ACEN Corporation is expected to finish its Monsoon Wind Power ...

As the first wind farm in Laos and the largest in Southeast Asia, Monsoon has set a new benchmark by securing a bankable cross-border Power Purchase Agreement. In addition to ...

China General Nuclear, a state-owned power company, has recently signed an agreement with Laos to expand a significant renewable energy initiative in the northern region of the country.

With abundant hydropower resources and growing demand for grid stability, energy storage solutions are becoming critical. This article explores how many energy storage power stations exist in Laos ...

Together with the Government of Laos, EDF signed a memorandum of understanding to undertake the feasibility studies for a Pumped Storage Hydropower project located nearby Nam Theun 2, with an ...

The project, a 1,200 MW wind power project in the Lako Focus Area, Sepon District, Savannakhet Province, marks the largest wind power development in Laos to date and is expected ...

In September last year, CGN and the Lao government signed an agreement to jointly build a comprehensive clean energy complex in the Lao provinces of Oudomxay, Phongsali, and ...

In a determined push to secure energy stability, Laos is intensifying efforts to expand its electricity infrastructure through ambitious hydropower and solar projects.

Dynamic testing of the full-capacity 600 MW grid has been completed, with the project currently undergoing a 72-hour reliability running test and power quality test. Full-capacity commercial ...

Laos Wind and Solar Energy Storage Power Station

With 80% of its electricity already coming from renewables (mostly hydropower), Laos is now betting big on energy storage solutions to juice up its regional influence. But how did this ...
