---

Mexico's CFE (state utility) raised industrial tariffs by 9.4% in 2024, pushing factories toward off-grid alternatives. A single 40ft mobile solar container with 200 kWh battery storage now powers assembly ...

This report discusses the growing role of variable generation from wind and solar, the need for improved grid flexibility, and how battery storage can provide flexibility to facilitate higher penetrations of ...

The results show that, assuming no grid congestion constraints, 90% of Mexico's 2023 total electricity generation could be met with 190 GW of solar capacity and 600 GWh of battery storage, with just 6% ...

Mexico's new regulation mandating battery systems for solar and wind projects positions it as a model for energy storage integration in Latin America, according to a new report.

With 23% annual growth in battery installations, Mexico is becoming Latin America's energy storage hub. Whether you're powering a home or factory, choosing the right quality energy storage battery ...

While we expect battery storage to add value to Mexico's renewable energy market, there are still some challenges and unknowns due to the recent scaling of new battery technology.

The analysis is structured to be adaptable to any Mexico Container Type Battery Energy Storage Systems Market while providing actionable, region-specific insights.

With BESS, solar farms are able to store surplus energy during the day that can be distributed during nighttime when production stops. As part of Mexico's broader energy strategy, the federal ...

Future wind and solar energy projects in Mexico will be required to colocate battery energy storage systems equivalent to 30% of their capacity, a senior government official told the Senate on Tuesday.
