Nature Energy is a monthly peer-reviewed scientific journal published by Nature Portfolio. The editor-in-chief is Nicky Dean. [1] . The 2017 efficiency record (26.6%) in solar cell technology was published in ...

1025-1040 Solar and battery can reduce energy costs and provide affordable outage backup for US households by Tao Sun & Yuanhao Feng & Chad Zanooco & June Flora & Arun Majumdar & Ram ...

Modern energy systems are undergoing a radical transformation as renewable power generation becomes increasingly central to global decarbonisation efforts.

We aim to reflect the diversity of innovation driving the energy transition, including critical advances in systems design and engineering that enable these technologies.

Rooftop solar and battery storage can reduce energy costs and provide affordable back-up power for over 60% of US households, but benefits often bypass the high outage risk and ...

Solar cells, devices that convert sunlight into electricity, are helping to reduce greenhouse gas emissions worldwide, promoting a shift toward renewable energy sources.

Splitting water using sunlight is a promising route to green hydrogen, yet inefficient charge carrier utilization in photocatalysts limits their solar-to-hydrogen efficiency.

A power conversion efficiency of 33.89% is achieved in perovskite/silicon tandem solar cells by using a bilayer passivation strategy to enhance electron extraction and suppress recombination.

Solar photovoltaics are helping to address climate change by replacing fossil fuels in electricity generation. In 2020, the International Energy Agency declared that solar photovoltaics had...

Nature Energy MagazineSolar Power Generation

Nature Energy is a monthly, online-only journal publishing the best research on energy, from its generation and distribution to the impacts energy technologies and policies have on societies....
