Will MCPV build a solar cell factory in the Netherlands?

Dutch solar manufacturer MCPV, a spinoff of Resilient Group and one of SolarNL's companies, has also announced plans to build a solar cell and module factory at an unspecified location in the Netherlands. The company did not say how much funding it has secured from the Dutch authorities.

How much money does solarnl get from the Dutch National Fund?

SolarNL said in late June that it has secured EUR412 million (\$462.5 million) in grants and loans from the Dutch National Fund for Growth. Dutch solar manufacturer MCPV, a spinoff of Resilient Group and one of SolarNL's companies, has also announced plans to build a solar cell and module factory at an unspecified location in the Netherlands.

What is the solarnl programme?

The SolarNL programme is an ambitious collaboration between industry and research institutes for the development and large-scale production of circular integrated solar cells and panels made in The Netherlands. Project partners, besides MCPV, include Amolf, TNO, Solarge, Exasun, Lightyear Layer and Hyett Solar, among others.

Will the Dutch government support local PV Manufacturing?

Earlier this year in February 2024, the Dutch government opened a public consultation for a new subsidy scheme to support local manufacturing of solar panels, batteries and electrolyzers to reduce its dependence on foreign suppliers (see Netherlands Proposes Subsidies For Local PV Manufacturing).

A proponent of heterojunction PV cell and module manufacturing, MCPV has secured EUR4.2 million in financing from the Ministry of Economic Affairs, the Province of Groningen, and the Regional ...

The Netherlands" Ministry of Economic Affairs along with the Province of Groningen and the Regional Development Agency NOM have shelled out EUR4.2 million to support the development of a 4 GW ...
