Hyponatremia is the term used when your blood sodium is too low. Learn about symptoms, causes and treatment of this potentially dangerous condition.

Learn about the blood urea nitrogen (BUN) test to assess kidney function and what possible results could mean.

Explore how temperature affects solar panel efficiency and learn tips to maximize performance in different climates.

Not all solar panels are the same, so not all panels have the same optimal temperature. However, it is generally proven that the ideal operating temperature for an average solar panel is 77 ...

Curious about the best temperature for solar panels? Learn what keeps them working at peak power!

High cholesterol can be inherited. That means it can pass from parents to children through genes. But high cholesterol often is the result of lifestyle choices such as not getting enough ...

The optimal solar panel operating temperature is 25°C (77°F) under standard test conditions. However, practical performance considerations reveal a more nuanced picture.

The temperature of PV systems is usually 15-20°C higher than the weather on a clear sunny day. It means that the air temperature should be significantly lower to achieve an optimal solar ...

Mental health is the overall wellness of how you think, behave and manage your feelings. A mental health condition may be present when patterns or changes in thinking, feeling, or behaving cause ...

Ideal blood pressure is categorized as normal. Increased blood pressure may be categorized as elevated, stage 1 or stage 2 depending on the specific numbers. A diagnosis of high ...

Normal PV panel temperature

Most solar panels have a rated "solar panel max temperature" of 185 degrees Fahrenheit - which seems intense. However, solar panels are hotter than the air around them because they are absorbing the ...

People who have higher levels of HDL cholesterol often are at lower risk of heart attack and stroke.

Solar panels perform best within a specific temperature range, typically between 59°F and 95°F (15°C to 35°C). Contrary to what many might assume, warmer isn't always better when it ...

How much water should you drink each day? It's a simple question with no easy answer. Studies have recommended drinking different amounts over the years. But how much water a body ...

C-reactive protein, also called CRP, is a protein made by the liver. The level of CRP increases when there's inflammation in the body. A simple blood test can check your C-reactive ...

What is the normal temperature for solar energy? The typical operational temperature range for solar energy systems, particularly photovoltaic (PV) panels, is 20°C to 25°C (68°F to 77°F), ...
