The MOBICELL-350 delivers a hybrid solar battery system with 350W fuel-cell cabinet. Ideal for industrial, telecom and remote off-grid installations in Canada & USA.

Solar+storage+charging integrated system integrates photovoltaic power generation, energy storage, micro-grid control, and electric vehicle charging through an integrated solution.

Our battery enclosures can be pole-mounted or ground-mounted and are suitable for indoor and outdoor applications. If you are not sure which enclosure you should choose, please don't hesitate to email ...

Optimizing the use of renewable energy: Maximize the use of photovoltaic power during the day, while excess power is stored for use at night. Peak shaving & Valleyfilling: Supply power to the ...

The cabinet save time on-site and provide the customer with a neat, safe enclosure for their solar system installation. Our solar battery cabinet systems are storing Pylontech lithium-iron phosphate ...

Learn about the technological advancements of bidirectional charging and understand critical steps for your safe home electrification project installation.

In the event of a solar panel failing to meet the demand due to external conditions, the system uses a backup energy storage system that utilizes a bidirectional buck boost converter (BDC) for charging ...

Companies are repurposing street cabinets and experimenting with modular battery packs to offer electric vehicle charging stations. The industry's creativity continues to expand to ...

Discover how to design, deploy, and benefit from off-grid EV charging stations with solar panels, battery storage, and smart controls for reliable, sustainable charging.

Off-grid solar cabinets for bidirectional charging at train stations
