Find high quality plug valves for a wide range of shut off and throttling control applications.

Parker plug valves feature 1/4 turn shutoff allowing for ease of operation. All plug valves are 100% leak tested and are certified to be leak free to one SCCM.

The PV and PVG Series of valves provide a straight-through flow path in two orifice sizes. The valves utilize a non-wetted upper stem and a non-rotating lower stem in conjunction with a tapered seat for ...

The PV series of valves provide a straight-through flow path in two orifice sizes. The valves utilize a non-wetted upper stem and a non-rotating lower stem in conjunction with a tapered seat for positive shut ...

The PV series, single isolation plug type hand valve utilises soft seat and metal to metal body to bonnet connection for superior, bubble tight sealing capabilities at extreme pressures.

PV Series Plug Valves offer low-torque quarter-turn valve actuation ideal for laboratory and analytical instrumentation applications. The plug valve's lightweight and compact size make them an ideal ...

The system can monitor the operating status of photovoltaic equipment in real time and automatically adjust the valve positions to improve overall production efficiency.

PV Series plug valves are available with a vented stem and ported body to allow downstream pressure to vent to the atmosphere when the valve is in the closed position.

These valves offer a cost-effective and reliable alternative to ball valves. Available with various connection types and sizes, as well as options for handle color, a handle that indicates flow direction, ...

Lock PV series plug valves, locking hole diameter is 0.39 in (9.9 mm). To order a plug valve with locking device, add -L to the valve ordering number. Example: PVSS-FL4-04-L. Aluminum handle is ...
