By following these guidelines, you can ensure the safety and reliability of your solar energy storage system. The integration of batteries into photovoltaic systems not only challenges ...

Safety requirements: the use of certain hazardous substances is prohibited in the manufacture of batteries, gradually eliminating substances such as mercury, cadmium and lead. This ...

This conference will serve as a vital platform to discuss the future of battery safety and explore effective strategies to ensure the reliability and sustainability of these technologies.

Portugal's battery storage boom steadies prices, slashes blackouts and opens tech roles. Discover how new policies could reshape your power bill.

EU environment ministers met, yesterday, in Brussels to reach an agreement on a new regulation on batteries and waste batteries. Ministers also discussed the "Fit for 55" package and the ...

Join us for an engineering symposium dedicated to the fire safety challenges of battery systems, from consumer electronics and e-bikes to EV (electric vehicles) and building BESS (battery energy ...

The Society of Fire Protection Engineers (SFPE) has announced its upcoming Engineering Solutions Symposium, focusing on lithium-ion battery fire safety, to be held in Lisbon, ...

Portable batteries producers in Portugal are required to register as such, while managing waste batteries through a collective or an individual system. SCIEX has joined batteries compliance scheme ERP ...

Any battery, button cell, cell battery or accumulator that is hermetically sealed, can be carried by hand and is not an industrial battery or accumulator, nor a battery or accumulator for motor vehicles, ...

The Society of Fire Protection Engineers (SFPE) will hold a symposium on lithium-ion battery fire safety in

Portugal battery safety

Lisbon from 11 to 13 November 2025. The event will focus on risks in consumer ...
