CATL has confirmed that mass production of the high-voltage sodium-ion batteries for EVs and PHEVs is scheduled to commence in June, with the low-voltage packs for trucks following in ...

Top 10 Global Sodium-ion Battery Manufacturers in 2026 ranked by technology, production capacity, and market influence for energy storage solutions.

HiNa began mass manufacturing last year, bringing two sodium-ion products to market. One is a cube-shaped battery for storing electricity; it's already powering commercial-scale energy...

In order to maintain steady factory utilization, battery companies are shifting to the most abundant low-cost materials, with sodium-ion batteries to increase volume and further lower battery ...

CATL is bringing sodium-ion batteries to commercial scale, with plans to begin mass production of its new Naxtra cells in December 2025. The move positions the company to challenge ...

Armed with government R& D grants and the need to balance renewable energy in the national electricity grid, HiNa Battery has unveiled the world's biggest sodium-ion storage system.

This project opened on June 30, 2024, with battery cells supplied by Zhongke Haina, making it the largest sodium-ion battery energy storage system in the world.

We used a sodium-ion pouch cell that has potential for commercial up-scaling and deployment.

Sodium-ion batteries (SIBs) are emerging as a viable alternative to lithium-ion batteries (LIBs) due to their cost-effectiveness, abundance of sodium resources, and lower environmental impact.

Mass production is now a reality. CATL claims it has achieved what no other battery manufacturer has: mass

Sodium-ion solar container battery mass production

production of sodium-ion batteries. According to Gao, this milestone pushes ...
