Solar Resource Maps and Data Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. Solar Supply ...

This report uses data from the EIA to analyze solar and wind capacity and generation over the past decade (2014 to 2023) in all 50 states and the District of Columbia.

As part of the PERFORM project, NREL has produced a set of time-coincident load, wind, and solar generation profiles, including actual and forecasted timeseries data.

Estimated small scale solar photovoltaic generation and small scale solar photovoltaic capacity are based on data from Form EIA-861M, Form EIA-861 and from estimation methods ...

Data for solar and wind renewable energies in electricity production available in a map and excel file by country level.

The associated Renewables 2025 dataset gives full access to all of the data available in this dashboard for the Renewables 2025 forecast, plus additional premium data for all sectors and ...

This dataset contains yearly electricity generation, capacity, emissions, import and demand data for over 200 geographies. You can find more about Ember's methodology in this ...

Our forecasts attempt to predict HSL, which is uncurtailed power generation potential. This graph plots actual system-wide wind and solar generation, which is impacted by curtailment, shown as "Wind ...

Renewable energy statistics 2025 provides datasets on power-generation capacity for 2015-2024, actual power generation for 2015-2023 and renewable energy balances for over 150 countries and areas for ...

# Solar and wind power generation data table

It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for ...
