The Vienna Energy Framework Strategy defines the goals of the city's energy policy, the central strategic areas of action, and the related qualitative goals and implementation tasks.

In addition to mandating solar panels and energy-efficient buildings, Vienna is now heating thousands of homes with geothermal energy instead of planet-heating natural gas.

With Austria's national climate action stalling, Vienna passed its own climate law. The city mandates solar panels on new buildings, heats homes with geothermal, and targets net-zero by ...

Vienna has implemented its photovoltaic initiative in record time: The target of 250 megawatt peak (MWp) solar power capacity was reached ten months earlier than planned.

Over 1,500 new solar power installations have gone online over the past six months, helping fulfil the needs of 57,500 households in Vienna. Vienna has already met its target for ...

The animated energy flow chart of the City of Vienna shows how much energy is needed to supply the city, which energy sources the energy comes from and in which areas it is used.

Austria achieved its target under the Effort-sharing Decision for the 2013-2020 period, its 2020 target under the Renewable Energy Directive, and its primary energy consumption target under the Energy ...

This unprecedented growth was driven by a combination of factors, including rising energy costs, geopolitical tensions, and a strong desire for energy independence.

Austria's solar energy sector is poised for a major transformation with updated government subsidy guidelines taking effect on January 1, 2025. As part of the latest Austria ...
