How do I install solar panels?

Ground-mounted panels can be installed anywhere with good sun exposure and enough open space. A minimum of 350 square feet is usually required. Installing solar panels requires the following steps: Plan the solar energy system based on the home's size, location and energy needs. Measure, cut and assemble the support structure for the solar array.

Who installs solar panels?

If you're ready to go solar, knowing who installs solar panels is essential. The answer isn't too surprising: A solar panel installation contractor is the best pro to get your solar system running. Hiring a qualified solar panel installation company can help you harness the power of the sun and save on utility bills.

Can solar panels be installed on a roof?

If the roof is not suitable, homes can be equipped with ground-mounted solar arrays. Ground-mounted panels can be installed anywhere with good sun exposure and enough open space. A minimum of 350 square feet is usually required. Installing solar panels requires the following steps:

How does a solar panel installer install a battery?

Solar panel pros will also install a battery if it's part of the solar panel system. Finally, your solar panel installer will wire the system, connecting the inverter wires and routing them through a junction box and PV disconnect switch to your home's circuit breaker box.
