Spanning over 400 hectares, the CEME1 project, which was completed in less than three years, boasts an installed capacity of 480 megawatts, with 880,000 photovoltaic panels. A 220 kV ...

Data and information about Solar power plants and their location plotted on an interactive map of Chile.

Solar power in Chile is an increasingly important source of energy. Total installed photovoltaic (PV) capacity in Chile reached 11.05 GW in 2023. In 2024, Solar energy provided 19.92 TWh of electricity generation in Chile, accounting for 22.3% of total national electricity grid generation, compared to less than 0.1% in 2013. In October 2015 Chile's Ministry of Energy announced its "Roadmap to 2050: A Sustainable and Inklus...

The project is located in Maria Elena municipality, in the Antofagasta region in Chile. It is expected to be one of the country's largest solar and storage projects once fully operational.

Located seven kilometers from Maria Elena in the Atacama Desert, CEME 1 has 882,000 high-tech solar panels covering an area of 435 hectares. The plant is expected to generate enough ...

The photovoltaic plant's construction began in January 2015, and it began its operation in June 2016 with 160 Megawatt of panels, making it Chile's largest solar plant at the time. Northern Chile has the ...

Priority funding is directed toward integrated solar-plus-storage demonstration projects in the Atacama Desert, aiming to accelerate the energy transition in northern Chile. The Atacama ...

With a target to achieve 100% renewable energy by 2050, the Chilean market has attracted a diverse array of international and local solar companies. This 2025 list ranks the top players based on project ...

Enel Green Power Chile, will commence commercial operations of stages 1, 2, and 3 of the Las Salinas PV solar power plant. It will operate in conjunction with the Sierra Gorda Este wind ...

Solar panels at Chile solar base

Due to its high solar potential, solar power developments will likely grow most in the north. Solar generation is expected to contribute 46% of Chile's electricity in 2060.

The first two phases of Oasis de Atacama, the largest solar power and energy storage project in Latin America, have come on stream in Chile's Antofagasta Region.
