Zhu Gongshan said in his keynote speech that the photovoltaic industry has encountered the strongest internal circulation in history, with a serious mismatch between supply and demand, and the industry ...

When the cost of photovoltaic power generation per kilowatt-hour falls into the range of 1 corner to 1.5 corners, and that of storage energy reaches the critical point of 3 cents, there will be a ...

Zhu Gongshan chairs GCL-Poly Energy Holdings, a producer of polysilicon used to make solar panels.

Zhu Gongshan, chairman of the Global Green Energy Council and chairman of GCL group, said at the "China clean energy science and technology capital summit" held today that China ...

China's large-scale development of solar power, coupled with continuous innovation and a complete industrial chain, is driving down production costs and making new energy products more ...

"The mismatch between supply and demand is severe," Zhu Gongshan, founder and chairman of GCL Technology and chair of the Asian Photovoltaic Industry Association said at an ...

Chinese private companies are emerging as the dominant force in the country's booming solar energy industry, driving innovation, manufacturing and market expansion, said Zhu Gongshan, ...

It is estimated that the cost of grid connection of solar power and other clean energies will be lower than that of thermal power in some areas after 2020, and rational-price grid connection of ...

In the future, the cost of photovoltaic power generation will likely be less than 2 cents per kWh, but now the cost of power generation from coal is 5-6 cents per kWh.
