To address severe vulnerability to climate change impacts and extreme weather events, the project will also incorporate climate-resilient designs to address the project's and South Tarawa's exposure to ...

As stated by the ADB, the proposed project will initiate and contribute to the transformation of the Kiribati energy sector to one that is low-carbon and adapted to growing climate ...

Under the Scaling Up Renewable Energy Program in Low Income Countries. The project will generate 6.84 GWh of solar electricity, displace over 1.64 million liters of diesel fuel, and avoid 4,892 tCO₂e ...

The South Tarawa Renewable Energy Project (STREP) is being implemented by the Government of Kiribati with support from Asian Development Bank (ADB) and other co-financers.

The repository includes the full text of contracts; plain language summaries of each contract's key social, environmental, human rights, fiscal, and operational terms; and tools for ...

The Government of New Zealand is installing a diesel generator and fiber optic cables, and information management system for the entire South Tarawa grid (Bonriki-Betio), while ADB is supporting ...

It will do this by installing the innovative, climate-adapted and efficient floating PV (FPV) for power generation and for services and benefits beyond electricity.

It is the first ADB project in Kiribati's energy sector. STREP aims to strengthen Kiribati's renewable energy capacity through the installation of solar photovoltaic (PV) generation systems, a battery ...

The south Tarawa Renewable Energy project is grateful to have hosted its Initial Environment Examination (IEE) consultation at St Maria Mwaneaba Bikenibeu. This consultation aimed to Raise ...

South Tarawa Island Solar Air Conditioning Bureau

The project will add larger scale ground-mounted solar photovoltaic and battery infrastructure that will increase renewable energy contribution and displace more diesel fuel and, as a result, help to reduce ...
