To meet current challenges, such as limited grid capacity and increased loads, while optimising OPS needs, the project aims to develop a comprehensive microgrid solution that ...

To meet current challenges, such as limited grid capacity and increased loads, while optimizing OPS needs, the project will develop a comprehensive microgrid solution that combines ...

A new research project at the University of Skövde aims to reduce this impact by improving energy efficiency at the Port of Stockholm using an advanced energy management system ...

The review that was carried out shows that a hybrid energy storage system performs better in terms of microgrid stability and reliability when compared to applications that use a simple battery ...

Ports of Stockholm and its partners are launching a project that combines onshore power supply (OPS) and microgrid technology. The initiative will reduce emissions, improve energy ...

"By combining solar energy with battery storage, we can not only handle peak energy demands but also ensure a stable and sustainable power supply.

The project is a collaboration between Ports of Stockholm, the University of Skövde, Stella Futura, and Ilmatar. It is scheduled to run from November 2024 to November 2027, with the ...

One of the world's largest passenger shipping ports is launching a new microgrid and on-site power project to reduce emissions and improve energy efficiency in Sweden.

This project aims to reduce emissions, improve energy efficiency and increase the port capacity to meet growing energy demands. The microgrid solution integrates solar cell systems, ...
