---

The Syrian Minister of Electricity unveiled an ambitious plan to introduce up to 2,500 megawatts of solar energy and 1,500 megawatts of wind power by 2030, alongside the installation of 1.2 million solar water

This infographic summarizes results from simulations that demonstrate the ability of Syria to match all-purpose energy demand with wind-water-solar (WWS) electricity and heat supply, storage, and ...

The project aims to showcase how solar energy can act as a key driver for rebuilding Syria's energy infrastructure, promoting economic recovery, and reducing greenhouse gas emissions.

This investigation is based on interviews with 25 individuals, including loan beneficiaries, engineers, contractors, importers, and bankers, as well as an extensive review of official decisions ...

Summary: Explore how containerized generator sets address Syria's power challenges, from industrial applications to emergency backup. Learn about market trends, technical advantages, and real-world ...

The Syrian Ministry of Electricity is currently managing the construction of a 100kW solar power plant in the town of Sargaya, which is scheduled to be completed by the end of 2023.

In early June 2025, it also entered into similar agreements with Solar Rex Company to build a 100 MW solar power plant and a 70 MW solar and storage project in the rural areas of ...

Syria's power crisis is unlikely to be resolved through grid repair alone. For millions of Syrians, renewable energy combined with battery storage offers a practical, scalable, and affordable way to ...

Syria's state-owned General Corporation for Electricity Transmission and Distribution has signed a deal with Syrian-Turkish Energy Company (STE) to build a 100MW solar plant in Kafr Behm,...
