Energy Flow Analysis and Fr Ability of A Single 5G Base StationFr Potential of Aggregated 5G Base StationsFeasibility AnalysisThere are two types of 5G base stations: macro-base station and micro-base station. A micro-base station covers small space and consumes little energy. On the contrary, a macro-base station consumes more energy and covers wider space than micro-base station. Therefore, macro-base station has a greater FR potential, and this paper focuses primarily ...See more on link.springer iee A Study on Energy Storage Configuration of 5G Communication ...5G base station has high energy consumption.
