Place the solar panel in the hoisting installation of the scaffold lift and hoist the panel to the desired height using the hoisting rope. Lifting solar panels was never this easy.

The solar installation technician is using a rope to pull a 36.0-kg PV panel up the side of a roof. The rope goes over a pulley without slipping, and the technician is pulling with a tension of 285 N.

The Solmetric Module Lift is designed to help you safely and quickly transport a solar PV module on to a roof. The system uses your existing Werner or Louisville fiberglass extension ladder.

The Fluke Module Lift(TM) is designed to safely and quickly transport a PV module to a roof, streamlining the installation process of solar panels. This innovative tool enables you to lift solar modules to the roof with ...

Picture this: You're trying to adjust your rooftop solar array on a windy day, and suddenly that photovoltaic panel starts sliding toward the edge. Your first instinct? Grab a rope and pull it back to safety.

The Solmetric Module Lift is designed to safely and quickly transport a PV module to a roof. The device uses your existing fiberglass Werner or Louisville extension ladder.

The solar panel is attached to the beam with cutouts for the side poles. So you can quickly and quite safely lift solar panels, even from a large area to a height.

Safely and easily lift solar panels to the roof with the ladder-pulley system. This compact and simple-to-operate module lift system eliminates the need for heavy lifting as well as minimizes damaging the panels and the ...

Using hydraulic solar panel lifting systems enables safe, efficient installation of heavy PV modules on

The photovoltaic panel is pulled upward with a rope

complex or high-profile roofs, offering stability, reduced risks, and improved workflow for independent operators.
