The UK government has backed plans to develop a multi-weight gravity-led 4MWh energy storage system by project developer Gravitricity.

Skidmore, Owings & Merrill (SOM) is currently designing buildings that sound like they are from a sci-fi movie. Giant skyscrapers, some around three times the height of The Shard at up to ...

Once production hub of zinc and copper, the mine will now store renewable energy and supply it on demand to the grid. UK-based energy storage firm Gravitricity will soon begin work to...

The feasibility project will complete in late 2022 and will provide the information required to commence build of the full-scale commercial prototype multi-weight gravity energy store immediately thereafter, ...

The disused mine will be fitted with a gravity battery, which uses excess energy from renewable sources like solar and wind in order to lift a heavy weight.

UK-based energy storage firm Gravitricity will soon begin work to convert Europe's deepest mine into the first-ever gravity-based battery. The 4,737 feet (1,444 meters) deep mine is ...

A project to store renewable energy using gravity is taking shape in Edinburgh. The 131m demonstration at Forth Port's Prince Albert Dock is being developed by Gravitricity, a Leith based ...

The UK's Gravitricity and Australian company Green Gravity have this week both announced collaborations that will enable them to scout out potential sites where existing or former ...

ABB has signed an agreement with UK-based gravity energy storage firm Gravitricity to explore how hoist expertise and technologies can accelerate the development and implementation of ...

These startups use gravitation to store energy safely for a long time and deliver it on demand at a lower
