Our 1 GW project combines gas, solar, and battery storage to secure Kyiv's grid, cut emissions, and support critical services. Explore investment in this high-impact initiative.

In 2025 Ukraine deployed around 1.5 GW of new solar capacity driven by strong interest in co-located battery energy storage systems. BasenPower breaks down the key drivers, policy ...

Despite wartime risks and constant pressure on the energy system, Ukraine continues to develop a new decentralized, resilient, and modern energy infrastructure. One such project is the construction of a ...

The completed project in Chortkiv is the first solar energy project implemented by Nefco to support critical infrastructure in Ukraine. The solar power plants were officially commissioned on ...

The National Energy and Utilities Regulatory Commission of Ukraine (NEURC) has approved the connection of a 3.8 MW solar plant, integrated with a 6.9 MWh energy storage system, ...

The Solar Energy Association of Ukraine estimates around 1.5 GW of solar was added in the country last year, driven by growing interest in projects co-located with battery energy storage ...

In December, the International Energy Agency published a report covering three strategies for accelerating deployment of distributed solar-plus-BESS in Ukraine.

Modern energy storage systems will enable greater utilization of solar energy and stabilize electricity prices. The KNESS Group is currently implementing seven energy storage system projects ...

The project uses Fluence's Gridstack solution and is designed to provide enough dispatchable energy to power 600,000 homes for two hours. Construction of the project was ...

Ukraine solar energy storage project construction

This project is not only a step toward a new decentralized energy sector but also demonstrates the technological readiness of Ukrainian companies to implement complex ...
