The projects that meet your chosen criteria will populate in a table below the map. Further refinement can be made by adjusting the filters or using the search box to control the information displayed, or ...

Pins on the map represent wind facilities connected to the high-voltage transmission grid and show their respective generation from the previous hour. The Ontario forecast numbers provide an hourly ...

The Global Wind Power Tracker (GWPT) is a worldwide dataset of utility-scale, on and offshore wind facilities. It includes wind farm phases with capacities of 10 megawatts (MW) or more.

The Global Wind Atlas is a free, web-based application developed to help policymakers, planners, and investors identify high-wind areas for wind power generation virtually anywhere in the world, and then ...

Wind farms are no longer just about generating power - creating jobs, stimulating local economies and fostering a sustainable future are just some of their benefits. Energy Digital has ...

In 2023, about 10% (425 billion kilowatthours) of total U.S. utility-scale electricity generation was from wind energy projects in 41 states. 1 The five states with the most electricity ...

The Wildcat I Wind Farm, located in Tipton and Madison counties, is our first wind energy project in Indiana. One hundred twenty-five GE 1.6 megawatt turbines provide more than 200 MW of ...

Interactive map of wind farms in the US. View the largest projects, track new developments, and explore capacity data across all states.

The U.S. Wind Turbine Database (USWTDB) provides the locations of land-based and offshore wind turbines in the United States, corresponding wind project information, and turbine technical ...

## Where are the wind power generation projects located

Explore top U.S. wind energy projects launching from 2026, with insights on renewable trends, onshore vs offshore growth, and policy impacts on clean power.
