-----

Baoding Yitong Photovoltaic Technology Co., Ltd. (hereinafter referred to as "Yitong Technology"), established in 2005, with a registered capital of 60 million yuan.

Once installed, the operational costs of a commercial solar power plant are relatively low. Maintenance is minimal, and the system can operate for decades with little intervention.

Grid connected photovoltaic power generation system is to connect the solar photovoltaic power generation system with the conventional power grid and jointly undertake the power supply task.

This paper reviews the recent development of grid-connected PV (GPV) generation systems comprising of several sub-components such as PV modules, DC-DC converter, maximum power point tracking ...

Yitong New Materials announced that the company has partnered with Hangzhou Hutang Distributed Power Company to carry out a rooftop photovoltaic power generation project, aiming to ...

A small-capacity grid-connected solar power generation system, configured by a dual-output DC-DC power converter and a seven-level inverter, is proposed in this study.

Our researchers constantly research and bring you updated lists of renewable power generation projects using solar, wind, perpetual motion, footstep power generation as well as hybrid generation systems.

Globally, India has emerged as a significant player in renewable energy, ranking fourth in total renewable power capacity additions and fifth in solar power capacity.

Yitong can customize the solar power generation system you want according to your requirements. If necessary, we can provide engineers to your city to provide technical support and assist you in ...
